UPDATES

# Adequan injections recalled due to visible glass fiber

American Regent is recalling certain lots of Adequan injections for dogs and horses because visible glass fiber material was found in the product.

If you have an Adequan® Canine Injection (for dogs) or Adequan® i.m. Injection (for horses) from the recalled lots, this may affect you.

The recall covers two lots of Adequan® Canine Injection (lots 25011 and 3369) and two lots of Adequan® i.m. Injection (lots 24416 and 25265P).

Return or stop using the recalled product as directed in the recall notice and follow any instructions provided there.

What to do

- Follow the recall instructions provided in the recall notice for the affected Adequan® lots.
